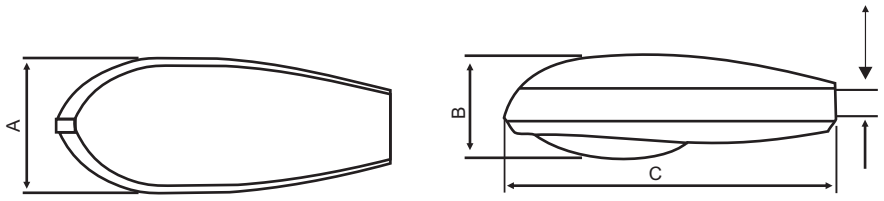
Roadway Lights

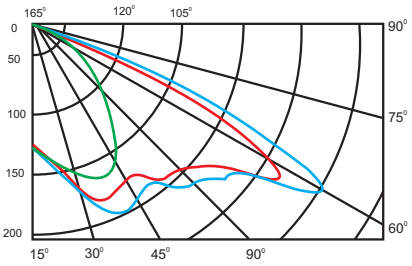
GLITZ

Phaedra

A robust fixture with streamline body specifically designed for large area lighting distribution



Light distrubution curve



Specification

To specify state :
Phaedra-M
Integral control gear suitable for discharge tubular lamps 70 / 150 watt SON or MH.
Lamp Socket : E 27.
Phaedra-XL
Integral control gear suitable for discharge tubular lamps 250 / 400 watt SON or MH.
Lamp Socket : E 40.
As Glitz Phaedra

Characteristics / Materials

The fixture is made of aluminum die cast. Surface is painted by high quality powder coat paint to resist variable environmental temperatures.
Different color options are available on request. Reflector is made of high quality aluminum, polished electrochemically for high reflectivity and stable optical property. Flat tempered glass lens to ensure the high output of the light lux and prevent the attenuation of the reflection ratio.
Body designed to ensure wide optical system, helps covering greater area for light distribution.
Protection rating is IP 65.
Phaedra-M
Available in control gear options of 70 ~ 150watt SON-T or MH-T lamps.
Phaedra-XL
Available in control gear options of 250 ~ 400 watt SON-T or MH -T lamps

Installation / Mounting

Lamp & control gear maintenance is easily achievable with single toggle operation.
Phaedra-M
Installation spigot size is 48 ~ 60mm. Recommended height for installation is 6 ~ 8 meters.
Phaedra-XL
Installation spigot size is 60 ~ 76mm. Recommended height for installation is 9 ~ 12 meters.
