

# High bay & Low bay Lights

## Decoy

A low profile high bay fixture for 70 / 80 / 125 watt HID lamps with flexibility feature of being converted into cost effective, high wattage applications

### Specification

To specify state :  
 High Bay fixture with 320mm diameter aluminum reflector.  
 Fitted with Integral control gear for 80W / 125W Mercury vapour,  
 70w / 150 w Metal halide.  
 Lamp Socket : E 27.  
 As Glitz Decoy

Lens & grid available at request

### Characteristics / Material

Control gear housing made of aluminum die cast with surface painted with powder coating.

Reflectors: Made of high purity aluminum. Options available for matt finish sand blasted reflector or shiny anodized reflector for high reflectance.

Ideal for medium height applications, i.e, shopping malls. Small size reflector enables restricted and concentrated light distribution for particular usage.

Control gear housing provides flexibility of converting small size HID gears into high size gears.

### Installation / Mounting

A range of suspension options to suit various applications such as pipe suspending installation or hook suspension are available. Control gear components mounted on a removable tray for easy maintenance.

All fixtures can be supplied with a pre-installed 3core 1mm<sup>2</sup> of 2m length cable. Suitable for : Medium height applications.
