

Energy Saver Down Lights

Kachina

Garin

Characteristics / Material

Scientifically designed highly polished & anodized aluminum reflector provides precise light control with optimum light utilization leading to substantial savings in energy cost and excellent ambient conditions.

Body : Reflector is fitted into white painted MS ring with 'quick-fix' mounting arrangement. Pre-coated frame ensure corrosion free life.

Installation / Mounting

Three nos. of retaining clips facilitate mounting in false ceilings. Fixture is design for easy installation and maintenance without disturbing fixture from ceiling.

Applications : Specially design for use in residential and commercial application like modern lobbies, hotels, shopping malls, hospitals, reception areas and other commercial establishments with false ceilings for energy efficient and aesthetic lighting.
