

Zain

Characteristics / Material

Body : Reflector is fitted into the frame with 'quick-fix' mounting arrangement. Frame is fabricated from CRCA MS sheet and epoxy powder coated white. Epoxy powder coated frame ensure corrosion free life.

Zain : Scientifically designed highly polished & asymmetrical anodized aluminum reflector creates a controlled light beam for illuminating vertical surface, ideal for shelving and wall lumens, leading to substantial savings in energy cost and excellent ambient conditions.

Daira : Scientifically designed matt finish anodized aluminum reflector for efficient glare free illumination.

Installation / Mounting

Two nos. spring-loaded clamps provided for mounting down lighter in false ceilings.

Easy installation and maintenance can be carried out from below. Lamp fitment/removal from holder requires horizontal movement of the lamp. Ballast part is mounted in another part of fixture and connected to fixture with cable under flexible pipe covering.

Applications : Fixture is specially designed for residential and commercial use like in modern lobbies, hotels, shopping complexes, hospitals, reception areas and other commercial establishments with false ceilings for energy efficient and aesthetic lighting.

Specifications
